### and what have you

by BOB CRAIG

On the day Congress adjourned, Representative Clarence Cannon, Democrat of Missouri and Chairman of the House Appropriations Committee took advantage of the opportunity to castigate the members of Congress for their financial irresponsibility. Thinking excerpts from this speech deserve the careful consideration of the public—since the Congress will soon go back into session in January—we turn the rest of this column over to Representative Cannon, who said to his fellow congressmen:

"We are spending this year \$115 billion, the largest amount ever spent in a peacetime year in the history of the American Congress.

"Gentlemen, when you go home you can attract special attention by saying, 'I have just come from a \$100-billion Congress.' You are the first man ever to come back to your congressional district from a \$100-billion Congress in all its history . . .

"Today the public debt is \$302 billion. It is now past the high water mark. It is the largest debt in the history of the United States. It is the largest debt ever owed by any nation in any country in the history of the world. We are still busily adding to it as fast as we can.

"Surely, gentlemen, we ought to be satisfied with a debt of \$302 billion. Why insist on owing more money? Why add to it? That is what you voted to do just now. And will you tell us what your people and your district gets out of it? Nothing but more taxes.

"There is many a taxpayer out on a small farm, a small businessman in the local town, a workman here who has a hard time paying even a few dollars of taxes. But then the Internal Revenue men bring it we spend it as you have spent to Washington we spend it all; it today.

"Today, gentlemen, you have voted to increase the annual expenditures of the Nation although the Government is already spending the largest amount ever spent in one peacetime year in the history of any nation on earth.

"You have today added to the number of Government employees when they are falling over each other in every department. Competent men tell us that if they only had one-third the number of employees in the Pentagon, they could do better work. That is true of every department of the Government. You have today voted to increase the national debt already so large that it staggers the imagination. I was in Germany after the war. At one time the German mark was an unassailable standard of value throughout Europe. Then Germany followed this primitive path until eventually the depositor had to carry his money to the bank in a basket. When they got to the bank, the bank did not count the money. It just distributed the bills by denomination and weighed it.

"In 1936 when a housewife took a dollar downtown to the grocery store, she got \$1.07 worth of groceries for that dollar. They wanted hard cash. But now they are not so keen about it. Today it is only worth 44 cents.

"The House, the press, and the country are becoming increasingly aware of the fact that it is rising non-defense expenditures that have unbalanced the budgets and expanded the national debt and, in consequence, precipitated foreign holders of our once peerless dollar to demand gold. We lack the self-discipline to live within our income, to pay our way as we go. That is the genesis of our present tenuous fiscal situation."

## DECEMBER 14 IS FINAL DAY FOR WHEAT PROGRAM SIGN-UP

College Station—December 14 is the last day for signing up under the 1963 wheat stabilization program for farms in the winter wheat area, the Texas Agricultural Stabilization and Conservation Committee has announced.

Farmers who participate in the 1963 program will be eligible to receive special payments for voluntarily diverting a part of their allotment or

base acreage from the production of wheat and devoting that acreage to a conservation use. They will also qualify for extra price-support payments and for the regular price-support loan or purchase agreement, the State Committee said.

Under the voluntary wheat reduction program, farmers may divert from 20 to 50 percent of their wheat allotment or base acreage, with special diversion provisions for small farms. The diverted acreage must be devoted to an approved conservation use.

Growers are cautioned, however, to sign up for only the amount of acreage they intend to divert from 1963 production. Failure to divert the full acreage signed up would result in loss of diversion and price-support payments, as well as loss of the eligibility for the regular wheat price-support loan or purchase agreement, the Committee said.

Complete details on the 1963 wheat stabilization program are available from county ASCS offices. Growers are urged to visit their county office before the December 14 deadline if they have questions about the program.

Grady Milsap, 40, a native of Hamlin, and a member of the staff of the University Press since 1951, died in Dallas Friday after a long bout with cancer.

A nephew of A. H. Milsap, he was born here December 6, 1921. His parents, Mr. and Mrs. A. V. Milsap now live in Ballinger.

He helped guide hundreds of NTSU journalism students through the intricacies of the English language and five other tongues he spoke and read easily."

## SANTA TO MAKE APPEARANCE HERE WEDNESDAY, DEC. 12

Santa Claus is coming to Hamlin on Wednesday, December 12 with his huge 40-foot rocket sleigh, to give all the children FREE rides.

The giant rocket sleigh made of aluminum, is trimmed in red and blue, with flashing red and green lights. NINETY children can be seated on the Rocket for each ride. Bob Craig, Co-Director of the Trade Committee of the BCD said. The BIG ROCKET SLEIGH can operate in any kind of weather, being completely enclosed and heated.

Santa will personally interview each child on the Super Rocket Sleigh. Concealed speakers on the Giant Ship will broadcast the interview throughout the business area. Christmas Carols are also played continuously.

Santa's Crew, all dressed in costume, will help Santa in taking care of all the boys and girls who want to ride. The crew of five includes Santa

Claus, the Space Pilot, Co-Pilot, Space Captain and Space Hostess.

Free ride coupons will be given away by the cooperating local merchants who have arranged for Santa's appearance in Hamlin. Santa has urged parents to bring their children down early in the day, to offset the after-school rush.

The giant Rocket Sleigh which will follow a route set by the local committee cost more than \$20,000. Inside, the Rocket is well-lighted so that parents can see their children as Santa talks to each of them.

A ride on the Sleigh will be given FREE, on presentation of a ride coupon, obtainable from one of the participating local merchants. In exchange for the coupon, Santa's ticket-man will give a numbered ride ticket. Groups will board the Rocket Sleigh as their number is called. In a single day, as many as 4600 children have ridden with Santa.

## DECEMBER 11 SET AS DATE FOR COTTON QUOTA VOTING

The cotton quota vote coming up on December 11 will mark the tenth consecutive year in which growers have voted on marketing quotas for their upland cotton crop, J. E. Nix, Chairman of the Jones County Agricultural Stabilization on marketing quotas for the vote, said today.

"Beginning with the referendum marketing quotas for the 1954 crop, growers have approved quotas for each year's cotton crop," he stated. "In the vote last year, on quotas for the 1962 upland cotton crop, 96.9 percent of the growers voting approved the quotas."

By law, quotas must be proclaimed by the Secretary of Agriculture in years when the cotton supply exceeds normal. The estimated 1962-63 supply of upland cotton exceeds the estimated normal supply by 4.7 million bales.

For 1963, the chairman explained, Jones County has a total of 104,462 acres available for allotment to the growers on which to grow their upland cotton crop. This represents the county's share of the national allotment acreage of 16,250,000 acres, which includes 250,000 acres from the national acreage reserve to take care of minimum farm allotments. Individual farm allotments will be available to producers in advance of December 11 referendum.

It is not anticipated that this will be the final national acreage authorized for the 1963 crop because of new legislation to be recommended to Congress by President Kennedy. Establishing the national acreage allotment at the statutory minimum for the time being will give the Congress maximum flexibility in determining the acreage provisions to be included in the new legislation, USDA officials have said.

It is anticipated, however, that such legislation would substantially change the basic program choices cotton farmers will vote on in the quota referendum December 11.

If at least two-thirds of the growers voting in the referendum

approve quotas for the 1963 upland cotton crop, price support at a level within the range of 65 to 90 percent of parity will be available to growers who comply with their farm allotments, and marketing quota penalties will apply to any "excess" cotton produced on a farm.

If more than one-third of the voters oppose quotas for the 1963 crop, the allotment program will remain in effect, and price support will be available to cooperators at 50 percent of parity, as provided by law.

All farmers who engaged in the production of upland cotton in 1962 are eligible to vote in the December 11 referendum.

## STATE CAPITAL Highlights AND Sidelights by Vern Sanford TEXAS PRESS ASSOCIATION

AUSTIN—Republicans have turned Texas into a two-party state.

The heavy vote for Jack Cox against John Connally, election of two members to the national House of Representatives and seven members to the Texas House, plus substantial Republican votes in nearly all areas, are being interpreted by many State Capitol observers as meaning that never again will the Democratic nomination be "tantamount to election."

Dallas County elected every Republican candidate for county and legislative office they had on their ballot, and gave Cox a 25,000-vote lead over Connally, Tarrant and Harris were close, Bexar, El Paso, Travis and Nueces, the next four of the big counties went Democratic.

Unofficial and incomplete returns indicate that Connally carried 204 counties and Cox carried 50. But it was the substantial votes in the 204 counties he lost which makes this election significant.

Connally is conferring with legislators and with the state boards and commissions. He will not make complete budget recommendations, since outgoing Gov. Price Daniel is required, under the Constitution, to make budget recommendations to the Legislature in January.

But Connally will make his own budget proposals in his message to the Legislature. Industrialization, tourism, higher education and water conservation are the areas of state activity which Connally stressed most in his campaign. He will propose the creation of a Bureau of Commerce to take over tourist and industry-attracting.

The new governor, with a 120,000-vote margin of victory under his belt, said he holds no ill will toward areas which voted against him, that he will be governor for Republicans as well as Democrats.

Main areas where the Republicans ran strong were in the oil areas of West and East Texas, in the major cities, and in the Panhandle. They elected local officials in Midland, El Paso, Smith, Dallas, Kerr, Bexar, Pecos, Hutchinson, Zavala and Randall Counties.

**CAMPAIGNS TOO LONG**  
After the longest political campaign in Texas history there is a desire—on the part of many candidates, and the voting public—to return to the shorter campaign periods.

The old late-in-July, late-in-August and early-in-November voting months were far less strenuous than the present early-in-May, early-in-June, and early-in-November dates.

Campaigning in the heat of the summer now is very much preferred over the cold winter months and the long, tedious battle period that extends from December to November.

Don't be surprised if there is a big demand to return to the old election dates. They consumed only about 120 days, compared with this year's long, drawn-out, pace-killing, man-killing, more-than-300-day battle.

Governor-Elect John Connally has been quoted as saying he would favor moving the primary elections to August or September, as they are in most two-party states.

Under the present system the various party organizations close shop during the summer. Then it becomes necessary to re-organize and re-vitalize each setup for the General Election campaign. Heretofore the momentum generated carried them through to the November election. They got it all done in one big swoop.

Another reason for reverting to the old dates is that the cost of maintaining a long campaign naturally is much greater than the expense involved in a short one.

**ISLAND UNDER FIRE**—Officials of state and federal government had a heated discussion about land values on Matagorda Island in a preliminary round in the General Land Office.

Main bout will take place during the November 19 session of the U. S. District Court at Victoria, where the federal government has filed suit to condemn a lease on some 18,000 acres of land on the island. State of Texas will contest the suit.

U. S. has leased land on Matagorda Island since 1942 for Air Force bombing practice. But when Land Commissioner Jerry Sadler was notified on May 31 that a new 5-year lease was in the offing, he raised objections.

Uncle Sam leases state-owned land there for less than six cents an acre annually. Some of it is subleased for grazing at 25 cents per acre.

In last week's Austin meeting between representatives of the U. S. Department of Justice, the State Attorney General and the Land Office, it was learned that federal appraisal of the disputed property was made from an airplane.

Government appraiser placed a 44-cent-per-acre value on beach and grass land owned by the U. S., set a six-cent value on some state land; and a zero value on other state-owned

property—to reach a 25-cent rental rate.

State land was described as "marshy and boggy," but Rep. Grainger McPhay, chairman of legislative committee on the state-owned lands, said he'd like to own "some of that worthless land," which is thought to be rich in mineral value.

Land Office questioned the government's need for all the land it seeks to lease.

An assistant to the U. S. Attorney General replied that U. S. Air Force and Navy bombing and strafing operations were subject to error—both human and mechanical—and simultaneous use by the public and armed forces would be "impractical."

**EMERGENCY RESOURCES**—Gov. Price Daniel appointed Major General James E. Taylor chairman of a 35-member Texas Emergency Resources Planning Committee.

In answer to a presidential request, the committee will plan for conservation and use of essential resources and services at state and local levels in case of nuclear attack, and a temporary breakdown of control of service operations.

James H. Garner, state coordinator of Civil Defense and Disaster Relief, will serve as State Emergency Planning Director. Other members of the committee include representatives of government, industry,

commerce, consumers' services, labor and agriculture.

**EMPLOYMENT UP**—Unemployment in the state dropped in September to its lowest level since October, 1959. September showed 155,400 unemployed as compared to 170,100 in August.

Employment increased from 3,471,300 hired workers to 3,472,800. Texas Employment Commission predicted an overall gain in employment between September and November, with a heavy concentration in non-factory industries.

**FISH CREEK DAM**—The Texas Water Commission authorized a permit to the City of Gainesville to build a \$1,724,143 dam system on Fish Creek, a tributary of the Red River.

Plans for the dam, which was backed by local citizenry 2 1/2 to 1 in a local bond election, will include a reservoir with storage capacity of 23,210 acre feet; supply pipeline to town; and a filter plant.

Surface water will be used with water from Trinity wells

until the well supply dwindles. Then the reservoir is expected to supply all water for a population expected to reach 24,000 in 1995.

**OPTOMETRY RULE CHALLENGED**—An attorney for Texas State Optical accused the State Board of Optometry Examiners with passing a rule unrelated to optometry when the board met with the House Committee on State Licensing and Examining Boards.

House committee is in the process of checking the efficiency of operations of each of Texas' 24 state licensing agencies.

Rule challenged by attorney Quentin Keith would prevent optometrists from practicing under a trade name and force an optometrist to be in his office 50 per cent of the time he's open for business.

Disputed rule—approved in December 1959—has never gone into effect because of a restraining order Lee Optical filed three days after its passage.

Injunction is still effective, since the suit has not come to trial.

# DOOR OPENERS

Keys and churches are door openers. In both cases, each require you to put forth some effort. The key you must insert in the lock and turn. Our Lord made the way to heaven even easier, for all that you have to do is present yourself and believe.

*"For by grace are ye saved through faith; and that not of yourselves: it is the gift of God: Not of works lest any man should boast: For we are his workmanship, created in Christ Jesus unto good works, which God hath before ordained that we should walk in them."*

EVERYONE IN THE CHURCH  
THE CHURCH IN EVERYONE

The Church is God's appointed agency in this world for spreading the knowledge of His love for man and of His demand for man to respond to that love by loving his neighbor. Without this grounding in the love of God, no government or society or way of life will long persevere and the freedoms which we hold so dear will inevitably perish. Therefore, even from a selfish point of view, one should support the Church for the sake of the welfare of himself and his family. Beyond that, however, every person should uphold and participate in the Church because it tells the truth about man's life, death and destiny; the truth which alone will set him free to live as a child of God.

The community of Old Glory, looked rather desolate on Thanksgiving Day. It seemed that more "went" than "came" for the day of turkey-eating. "Turkey day" at the school was on Tuesday. Mrs. Verna House, lunchroom supervisor, always turns out tasty foods, but of course turkey, dressing, gravy, cranberry jelly, fruit salad and other foods are sort of special so we take on over these meals. Several visitors came for the occasion.

Thanksgiving parties in the Elementary grades were held on Wednesday afternoon at 1 p.m. Hostesses in the various grades were responsible for the goodies provided the children. Games and entertainment were provided for the hour parties. Hostesses in the first and second grades were: Mrs. Allen Letz, Mrs. John L. Garner. Hostesses in the third and fourth grades were: Mrs. Mid Johnson, Mrs. Milton Dudensting. Hostesses in the fifth and sixth grades were: Mrs. Oren Baldree, Mrs. Otis Palmer, and Mrs. Floyd Jernigan. Seventh and eighth grade sponsor, Mrs. V. R. Leverett surprised the students with pops, gum and Lifesavers. The students played "Password."

## JUNIOR 4-H BOYS

The Old Glory Junior 4-H Club B-ys met Tuesday at 9:30 a.m. in the 7th and 8th Grade Room. The program featured two talks with questions following. Kenneth Jones discussed the "Feeding of Swine" and Lyndell Quade talked about "Sheep Feeding." Reports for the next meeting were assigned to Weld-n Spitzer, Steve Letz, Gary Teichelman and Herbie Woodbridge. They will discuss breeds of various animals—Pigs, Cows, Chickens, and Sheep. The meeting was presided over by the president, Larry Flow. Jimmy Leverett led the Opening Exercises. The

group played one game. Others present than the above mentioned were: Mike Baldree and Clifford Gholson. Also Adult Leader, Mrs. V. R. Leverett.

## COMMUNITY

During the holidays two families made "moves" in the community. The John L. Garner family moved north of town to the place they have recently purchased. They will live in the house known as the Hill Savers house. The house formerly occupied by the Garners will be occupied by the Cliff Gholson who have been living near Sagerton. They purchased the house and have done some remodeling. These moves will not affect the school as the Gholson's children have been enrolled here for several years. Terry graduated in 1960. Linda is in the 10th grade and Clifford is in the 8th. The Garners' two children in school, Beverly and Johnny will now ride the bus.

## SCHOOL

The Junior class members spent Tuesday and Wednesday in the taking of the Iowa Test of Educational Development. There are twelve students in the class. The test was administered by Mrs. Maxine Klump.

Superintendent V. R. Leverett was at Hawley Wednesday afternoon and met with other superintendents in the District to make plans for the Literary events of the Spring Interscholastic League meet. The events will be held at the Hawley school.

Seventh and Eighth grade students have been selling two-pound fruit cakes as a money making project. They still have a few available if you happen to want one. Class sponsor is Mrs. V. R. Leverett. Larry Flow is class president.

Two Basketball games last week were played at home, one high school and one grade school. The high school teams were defeated by Hawley teams on Tuesday night before a large crowd. Hawley teams always have a nice following. The grade school students played their first games against Peacock and came out on top. Regardless of the score in the grade school games the audience always sees a good show. The young boys and girls are real scrapers and really get steamed up. The high school teams played Guthrie there Friday night and won both games.

County Nurse Lu Boldez was at the Old Glory school last Wednesday and administered to those who missed it the Sabin Oral Polio Vaccine. She reported that the county fell way short of the number that showed for the first turn-out. Sickness was attributed to have caused much of this.

Mrs. Aaron House, lunchroom supervisor, served the traditional big turkey feed on Tuesday. The students always look forward to these special days though they eat so well every day they certainly cannot complain.

Mr. Lynn Flowers, who recently underwent surgery in the Stamford Hospital, is recovering nicely. Best wishes for a speedy recovery, Mr. Flowers.

Stanley Diers was in Cisco over the weekend where he attended a Youth Meeting of the Lutheran Church.

Mr. and Mrs. Beno Herttenberger has as Sunday guests three of their sons, Jerry, Malcolm, and Don and their families.

# NEINDA PHILOSOPHER FAVORS GOVERNMENT EXPERIMENT OF BRINGING WEATHER FORECASTERS CLOSE TO HOME

Editor's note: The Neinda Philosopher on his Johnson grass farm on route one drops international affairs and discusses the weather this week. Dear editor:

Some people don't think the world makes any progress, but it does. For example, take weather forecasting. A while back a little shower caught me out in the open without a raincoat and I got soaking wet. What I was doing was changing the props from the north side to the south side on a fence of mine. You'd think a fence would lean in the same direction all the time but mine leans one way a while then leans the other, and it keeps a man pretty busy sighting down it to see which side to put the props on.

At any rate, the day had been clear and sunny until I suddenly looked up to discover a cloud had turned up and rain was pouring down.

After I got home and dried out I pulled out a newspaper I'd been saving for a rainy day which is a lot easier than cash and read a long article on a new experiment in weather forecasting.

According to it, the government is experimenting with more community forecasting stations. It's one thing, it said, to get the weather report for a general area covering a fourth of the state, but what farmers need is a station that'll forecast the weather right at home.

This will be a great improvement and a sample of progress.

I don't mean to say the local station will be more accurate than the big-city station, when you're living on a globe that's traveling through space as fast and far as this one is every 24 hours, it's possible to predict what the weather ought to be tomorrow but a lot easier to tell what it was yesterday and a man is still going to get caught in a rain, but the progress comes in being able to pinpoint the blame.

There's very little satisfac-

## ACC to Limit Enrollment

ABILENE—Abilene Christian College has announced that enrollment in the freshman class next year will be held to 1,030 students.

Present freshman enrollment is a record 1,008. Abilene Christian College enrolled 2,778 students for the 1962-63 school year, the ninth straight year for a record student body.

In addition, the College is requesting that new students make application for the 1963-64 school year not later than March 1, 1963.

College officials also announced that new students will be encouraged to enroll in the 1963 Summer Session by guaranteeing them a room in September—assuming that they meet scholastic requirements. A spokesman explains that Span-Applications from students requesting summer enrollment will be processed first, immediately after March 1.

## Loans Available Now for Rural Rec. Enterprises

L. J. Cappelman, State Director of Farmers Home Administration, today announced that loans may now be made to farmers and ranchers who personally manage and operate no larger than family farms for providing recreational facilities which will enable these family farmers to supplement their farm income.

Loan funds for recreational enterprises may be used to develop land and water, construct buildings, and to purchase land, equipment and other related recreational items including the payment of operating expenses. Recreational enterprises which may be financed on family farms including camping grounds, swimming facilities, riding stables, vacation cottages and lodges, lakes and ponds for boating and fishing, docks, nature trails, picnic

grounds and hunting preserves. Each loan is scheduled for repayment within a period consistent with the borrower's ability to repay, taking into account his income from farming, recreation enterprises and any other income he may have. The maximum repayment period of the loan depends on what the funds are used for and the security provided for the loan. Repayments on loans secured by real estate may not exceed 40 years. Repayments on loans for non-real estate purposes may not exceed 7 years. The interest is 5 percent per year on the unpaid principal.

The county or area committee of the Farmers Home Administration determines the eligibility of the applicant. The committee consists of three farmers who know rural farming and credit conditions in the local area.

Technical management assistance will be provided with each loan. The amount of the loan depends upon the appli-

cant's needs and repayment ability. A borrower's total principal indebtedness for intermediate-term FHA loans and equipment and operating expenses may not exceed \$35,000. A long-term loan secured by real estate may not exceed the normal value of the farm and other security, minus any debts against this property and may not exceed the amount certified by the county com-

mittee. In no case may such a loan plus other debts against the security property exceed \$60,000.

A farmer may apply at the County Farmers Home Administration Office located at Anson, Texas. There he will be given an application and the supervisor will be glad to answer any questions he may have.

### FAIRVIEW NEWS

By MRS. ELMER JOINER

Since Thanksgiving has just passed, we have lots of news out our way this Monday morning. It seems every one either had company or went visiting.

We all have much to be so thankful for, but it is doubtful if we pause long enough to really think about our blessings and to count them. Good health and all our material blessings should not be thought about until we count our spiritual blessings, but we are all human, and although we are only promised bread and raiment, no matter what we have, we always want more.

The annual Thanksgiving program and supper, was held as scheduled, at the Oil Mill Guest House, last Wednesday night, with over thirty people attending. A bountiful meal was served at seven o'clock, dishes washed, then a Thanksgiving program was presented, followed by a fellowship hour.

Since our church has no kitchen facilities, we are always grateful for the privilege of using the oil mill kitchen. It is a blessing to our church to be able to use it.

The Thanksgiving party was almost upset when it was learned that Mr. and Mrs. M. S. Johnson, Mrs. J. F. Vaughan, were all coming as guests of Mr. and Mrs. Winslow Gray, who were in the car with them, had a wreck at the intersection of the two highways at the traffic light. Two girls in a car from Aspermont, were in a wreck with Mr. Johnson's car, all were taken to the hospital, but Mrs. Vaughan was the only one to stay in the hospital. It was found out later that she had suffered some cracked ribs, which can prove very painful. The Johnsons and the Grays made the party late, but shook up, and their appetite ruined.

We are all saddened this Monday morning to learn that Mrs. Will Fomby fell over the weekend and broke her hip and at this hour is in surgery at the Anson hospital. What the outcome will be, we don't know, but it is reported to be a very bad break and surgery is to be long and serious. Mrs. Fomby has been living in Anson, with Mrs. Lucy Gilbert, where the accident occurred. She is a pioneer resident of our community and has a host of friends, who will be very concerned about her.

Mr. and Mrs. Jimmy Holmes, Midland, spent the Thanksgiving holidays with Mr. and Mrs. Flaviel Holmes.

Mr. and Mrs. Joe R. Rosenbaum of Pampa, came Saturday night to visit his parents, Mr. and Mrs. Fred Rosenbaum.

The Winslow Grays and M. S. Johnsons, had their children, Mr. and Mrs. Marvin Johnson and boys, home for the holidays too.

Mr. and Mrs. E. A. Henry spent Thanksgiving down Houston way. Since they were not home Sunday, no details were learned, but they have a son and other relatives down that way.

Mr. and Mrs. Mel Jones had their son, Bill G. Jones, and family, home for Thanksgiving. They now live in Sherman.

### DEPENDABLE POWER

for RURAL INDUSTRY

There was a time when rural industry consisted of the saw mill, the cotton gin, and little else. Then the rural electric systems were organized and rural industry began to hum. Industries native to the rural area were joined by a host of manufacturing, industrial and processing projects, attracted by the steady, dependable, efficient electric service furnished by these member-owned electric systems. Farms and ranches became more productive and a billion dollar a year market for electric appliances was created.

The electric cooperatives of Texas have been good for everybody, warming the hearts and homes of rural citizens, creating a billion dollar a year market for home town merchants and furnishing dependable power for rural industry.

## ANNUAL HD CHRISTMAS PARTY TO BE HELD HERE DEC. 14

By Mrs. Elmer Joiner  
Attendance at the last regular council meeting for this year was light, the date November 21, falling so near the Thanksgiving holiday. Fourteen members, seven visitors, and nine clubs were present, with eight clubs giving a report. In the absence of Mrs. McAninch, Mrs. Harvey acted as secretary.

In the committee reports, Mrs. Maxey Harvey, yearbook chairman, said that the new yearbooks are ready and will be distributed at the Christmas party. Fruit cakes will be ordered and all Christmas card sample boxes were sold at cost. Mrs. Hubert Sullivan, 4H chairman, announced that the 4H achievement banquet, was held Nov. 5, and the 4H Christmas party will be held in Anson, at the grade school cafeteria, December 11.

Christmas party for the Home Demonstration Clubs will be held, December 14, at the oil mill guest house, in Hamlin. This is the place it was held last year, and is over the office of the oil mill, in south east Hamlin. Final plans were made, each club being given a duty to make the party a success. Mrs. Dunklin, recreation chairman, will have charge of

the recreation, also she and her club, Avoca, will be responsible for the program. Friendship will clean up and decorate the room, Pleasant Valley will bring a tree and decorate it. The coffee will be prepared and served, and the food on the table arranged for eating, will be supervised by Noodle and Corn-pore clubs. Corsages will be made and pinned on by Good Neighbor and Friendly Circle. Sunshine will register guests, Willow Creek will have charge of the gift exchange and Goodman and Stith will do the dirty work for the day, wash dishes.

Guests will come at eleven o'clock, bring a covered dish and a gift, to cost approximately one dollar, to be put on the tree and gifts will be exchanged. The gifts for the State School in Abilene, will not be brought this year, since the school asked that all gifts be sent early this year and each club sent theirs by Nov. 15.

The Furniture Selection program will be held in Stamford in the Kinney Furniture Store, the first week in December, the time and the program, will be announced later. Be on the lookout for this announcement.

## 90 PACKAGED HOSPITALS READY FOR MAJOR DISASTERS

Texas has 90 "packaged" hospitals on hand, ready for almost instant use following enemy action or a major disaster. Most of them are located at least 15 miles from assumed strategic target areas.

(Ed. note—Emergency Hospital units are located at Abilene, Sweetwater, Snyder and Haskell for use in this area.) The hospitals, costing \$21,000 apiece, were provided by the federal Office of Civil and Defense Mobilization as part of a nationwide stockpile program. They are administered in Texas by the state Office of Defense and Disaster Relief, with technical cooperation from the Texas State Department of Health.

### Rules on Rural Housing Loans Liberalized

Mr. L. J. Cappleman, State Director, Farmers Home Administration, advised the local County Supervisor, Mr. James C. Hayes, that recent legislation amends Title V of the Housing Act of 1949 by adding new provisions which authorize loans and grants for moderate cost housing and related facilities for elderly persons and families in rural areas. It liberalizes some regulations on rural housing loans now being made by Farmers Home Administration and sets up new direct and insured loan programs.

This new legislation will be administered in Jones County by USDA's Farmers Home Administration. Rural housing loans are made by this agency to farmers and other families living in rural areas who need improved housing and cannot qualify for credit from other sources.

One new provision will give those people, who are 62 years of age or over, special advantages not available under the earlier loan program. First, they can buy previously-occupied existing housing as well as improve their homes. Second, they can finance the cost of the building site as well as the dwelling with loan proceeds; other families must own the land on which to build the homes before they can apply for a loan. Third, cosigners may be used by elderly applicants who are deficient in repayment ability. Like rural housing loans now being made by Farmers Home Administration, these direct loans will bear interest at the rate of 4 percent and may be repaid over a period not exceeding 33 years.

For detailed information concerning rural housing loans for the senior citizen, Mr. James C. Hayes, local County Supervisor, Farmers Home Administration, may be contacted.

Mrs. D. W. Stell visited with her son, Lowell Stell and family in Hobbs, N. Mex. during the Thanksgiving holidays.

Outgrowths of the mobile army hospitals developed and tested during the Korean War, they can be completely installed by 40 or 50 people in four or five hours. In one test exercise an installation was made in 70 minutes by experienced personnel.

Local civil defense organizations in designated locations store and otherwise manage the hospitals and equipment. Emergency conditions such as the Cuban crisis are occasions for making sure the hospitals are in a high state of readiness. Each unit—already crated for instant shipment into stricken areas, is a complete 200-bed affair with facilities for three operating rooms, a pharmacy, x-ray service, clinical laboratory, sterilizing room, central supply room, and electrical power supply.

Each hospital weighs 24,000 pounds and contains 8,000 individual pieces of equipment, including a 1500-gallon water tank and pump for emergency water supplies. There are also complete medical supplies, from surgical caps and gowns to ether and alcohol which are separately packaged and marked to avoid fire hazards.

Local civil defense authorities provide refrigeration for items such as insulin and blood derivatives. Antibiotics and other materials with expiration dates are labeled "deteriorative" to indicate they must be periodically inspected and rotated.

State civil defense and health authorities estimate that emergency hospitals will have to provide at least half the total hospital beds following a major emergency, since most conventional hospitals are located in metropolitan centers which may be targets of enemy action.

Doctors and nurses to staff emergency hospitals will be recruited from the community where the unit is installed for service, according to present planning. (A weekly feature of the Health Education Division, State Department of Health)

## COTTON CLASSING OFFICE NOW OFFERING 'MIKE' READINGS

A new service has been initiated by the U. S. Department of Agriculture Cotton Classing Office. It is a micronaire Reading Service. This service makes it possible for a producer to get the micronaire readings put on his Green Card. This service is voluntary, and a charge of eight cents for each sample is made.

In order to get the service, a Gin must make application for it. Since it would be extremely difficult to mike for an individual, who may gin at several gins, the service is set up to include all samples from the gins that sign up. A gin may make application and begin the service, and may stop the service any time they so desire. After the service is discontinued once, it cannot be re-instituted in the same season.

According to Mr. Manly, there appears to be some questions as to what a Micronaire, (or "Mike," as it is usually called) reading is, and for what purpose the reading is used. To the merchant and spinner the mike reading is an index to the maturity of cotton. The degree of maturity in turn indicates to the spinner how the cotton will spin. Immature cotton is weak and usually not very uniform in character and length, and does not spin well, and is usually indicated by a low mike

reading. Generally, cotton that mikes 3.5 and up is normal and most desirable, although readings above 5.5 may be rejected for some uses. Cotton that mikes below 3.5 is usually penalized in price by the Cotton merchant. The amount of the penalty depends on how low it reads and how much demand there is for the Cotton.

The government loan makes no difference in price for low mike cotton; however, if a bale is designated "Wasty" it is penalized four cents a pound. A Classifier may designate any bale wasty if in his opinion it should be, however, any bale which "mikes" below 2.7 must be designated wasty. The mike reading has nothing to do with grade, although the grade is seldom good on low mike bales.

The "Mike" is now not new to the Abilene Office. We have been using the instrument the past four seasons. Mr. Manly says, but until recently we did not have the authority to release the readings. They continue to mike any cotton they feel necessary, regardless of whether they have made application or not.

The service will not delay getting their cards back. Should we begin to fall behind on the mike service, the Classing Office will by-pass the areas which have mike readings.
